

There will be at least 15 problems from previous exams. In addition there will be at most 10 problems from the following list.

Section 10.1 page 610 # 13, 15, 27, 35

Section 10.2 page 617 # 15, 25

Section 11.1 page 639 # 15, 31

Section 11.2 page 646 # 19, 23

Section 11.3 page 651 # 13

Section 11.4 page 658 # 5, 7, 21

The final exam will consist of 25 questions. The actual problems on your final exam will be from the above list. They will be similar problems. However, we may change the problem by writing it with different constants. For example, in a problem listed above it says, $5p^3$, whereas the problem on your final says, $12x^2$.
