• *Note 1: Data represents results for Fall, 2006 cohort of new, first-time, degree-seeking students including:*

1. *Students who were 17-19 year old at the time of initial enrollment who attempted 12 or more units in the first year and/or*
2. *Students who identified a goal of degree or certificate completion or transfer to a university upon enrollment who attempted 12 or more units in the first year and/or*
3. *Students who demonstrated an intent to finish a program by completing 12 or more units and attempting a transfer- or degree-level English or math, or advanced occupational course within 6 years.*

• *Note 2: We examined program completion at the institutional level and there are no calculations of graduation rate by program. Since our study is based on a cohort model, the award counts by program would not be the same as annual award counts in each program.*

• Note 1: Data represents results for Fall, 2006 cohort of new, first-time, degree-seeking students including:

1. Students who were 17-19 year old at the time of initial enrollment who attempted 12 or more units in the first year and/or
2. Students who identified a goal of degree or certificate completion or transfer to a university upon enrollment who attempted 12 or more units in the first year and/or
3. Students who demonstrated an intent to finish a program by completing 12 or more units and attempting a transfer- or degree-level English or math, or advanced occupational course within 6 years.

• Note 2: We examined program completion at the institutional level and there are no calculations of graduation rate by program. Since our study is based on a cohort model, the award counts by program would not be the same as annual award counts in each program.

• Note 1: Data represents results for Fall, 2006 cohort of new, first-time, degree-seeking students including:

1. *Students who were 17-19 year old at the time of initial enrollment who attempted 12 or more units in the first year and/or*
 2. *Students who identified a goal of degree or certificate completion or transfer to a university upon enrollment who attempted 12 or more units in the first year and/or*
 3. *Students who demonstrated an intent to finish a program by completing 12 or more units and attempting a transfer- or degree-level English or math, or advanced occupational course within 6 years.*
- *Note 2: We examined program completion at the institutional level and there are no calculations of graduation rate by program. Since our study is based on a cohort model, the award counts by program would not be the same as annual award counts in each program.*

• Note 1: Data represents results for Fall, 2006 cohort of new, first-time, degree-seeking students including:

1. *Students who were 17-19 year old at the time of initial enrollment who attempted 12 or more units in the first year and/or*
 2. *Students who identified a goal of degree or certificate completion or transfer to a university upon enrollment who attempted 12 or more units in the first year and/or*
 3. *Students who demonstrated an intent to finish a program by completing 12 or more units and attempting a transfer- or degree-level English or math, or advanced occupational course within 6 years.*
- *Note 2: We examined program completion at the institutional level and there are no calculations of graduation rate by program. Since our study is based on a cohort model, the award counts by program would not be the same as annual award counts in each program.*
